## HOSPITALITY - DINING & CAFETERIAS

FFAE Architects maintains a unique depth of professional capacity that is familiar with the requirements of hospitality projects. This attention to detail is also required in food service which requires a focus on process and equipment, but also comfort for clients.

Our project team's priority is to listen to the client's wishes and needs and then balance the implementation of this information into the design while maintaining the project's budget and required compliancy with today's codes.
